

## Hosting Account List

From the Web Hosting Accounts page, you can view the disk space that is being used, as well as the bandwidth that is being used. You can also check the status of your account and find out the next billing date for each account. You may also cancel your hosting account from this page.

To set up a hosting account:

1. Click "Setup Account" next to the account you want to setup.

Manage Hosting Accounts IMPORTANT: You have items expiring, click here!

2. Enter a Username and password for your hosting account.

Enter your hosting setup information for: "Deluxe Hosting"

**User Name:**  **Name:**  Select from existing:

**Password:**   Enter a domain: www.

**Confirm Password:**

*The DNS for this entered domain must be set to use NS1.SECURESERVER.NET and NS2.SECURESERVER.NET as its nameservers.*

**Include FrontPage Extensions?**  Yes  No
 **Use a Dedicated Hosting IP?**  Yes  No

If FrontPage extensions are installed you will need to use Microsoft FrontPage to publish your MS Access databases (if applicable).
   
*If yes, please pick which Dedicated Hosting IP you want to use:*

Dedicated Hosting IP #1, Expires 9/30/2004  
 Dedicated Hosting IP #2, Expires 9/30/2004  
 Dedicated Hosting IP #3, Expires 9/30/2004

**Apply Traffic Facts Credit?**  Yes  No  
 (1 credits available)

3. Select a domain name from the list of domain names in your customer account, or enter a domain name that you may have registered through another account or registrar.

4. Indicate if you would like to include FrontPage Extensions, apply Traffic Facts, or use a Dedicated Hosting IP credit.

5. Click the Save Settings button.

To edit a hosting account:

1. Click Settings next to the account you would like to update.
2. You may make the following updates:
  - change the hosting login password
  - install/uninstall FrontPage Extensions
  - manage MX records, sub-domains, total DNS Control, aliased domain names
  - buy additional bandwidth
  - add password protection to your Web statistics
  - add or use Dedicated Hosting IP credits
  - apply or cancel Traffic Facts
  - select a 404 Error Page

To add additional bandwidth to your hosting account:

1. Select **Settings** for the hosting account you want to modify.
2. In the "Other Settings" section, click **Buy Additional Bandwidth**.
3. Select the number of megabytes (**MB**) of bandwidth you wish to add (increments of 1000).
4. Select if you would like to apply the additional bandwidth for **One Month Only** or select **Upgrade Plan** to permanently add the bandwidth to your hosting plan.
5. Click **Continue** and proceed through the checkout process.

To install/uninstall FrontPage Extensions:

Note: FrontPage Extensions are required only if you used MS FrontPage to develop your Web site.

1. Select **Settings** for the hosting account you want to modify.
2. In the “FrontPage Extensions” section, click either **Install FrontPage Extensions** or **Uninstall FrontPage Extensions**, as the case may be.

To select a 404 Error page:

1. Select **Settings** for the hosting account you want to modify.
2. In the “Custom 404 Error Page” section, select one of the following options:
  - Make my 404 Page my Home Page
  - Use Custom 404 Error Page: (enter file name)
  - Use the Default 404 Error Page
3. Click **Save Changes**.

To manage MX Records, sub-domains, Total DNS Control, and Aliased Domain Names:

1. Select **Settings** for the hosting account you want to modify.
2. In the “Manage” section, click the link for the area you wish to manage.

## Traffic Facts

---

Traffic Facts helps you gather, manipulate, and report data that is crucial to your site's success. Traffic Facts does not require any management. Web statistics are updated each day, at midnight Arizona Time with the previous day's statistics. To access your Web site statistics, enter your domain name followed by “/stats” in your browser. For example: [www.insert-domain-here.com/stats](http://www.insert-domain-here.com/stats)

To add Traffic Facts Web statistics:

1. Select **Settings** for the hosting account you want to modify.
2. In the “Other Settings” section:
  - If you do not have Traffic Facts credits, click **Add Traffic Facts to this account** and proceed through the checkout process.
  - If you do have Traffic Facts credits, click **Apply Traffic Facts**.
3. Add a statistics password if you would like to password protect your Web site statistics.
4. Click **Save Changes**.

## Dedicated Hosting IP

---

Having a dedicated IP (Internet Protocol) means each Web hosting account has a unique address, not shared by any other accounts on the same server.

To apply a Dedicated Hosting IP to your account:

1. Select **Settings** for the hosting account you want to modify.
2. In the “Dedicated Hosting IP” section, click **Install Dedicated Hosting IP**. If you do not have available credits, please visit your Web site to purchase a **Dedicated Hosting IP credit**.
3. Select the Dedicated Hosting IP credit you want to use.
4. Click **Yes** to install the Dedicated Hosting IP.

While the Dedicated Hosting IP is being applied, it is important that you do not modify the contents of your Web site. Because the account is being moved to a dedicated IP address, we will be modifying the DNS for your site. The DNS change may take from 4-8 hours for .COM and .NET domains and from 24-48 hours for all other domain extensions. While DNS is updating, your site will still be reachable.
